

Production Technician

Syntony GNSS (Toulouse, France)

Position to be filled as early as February or March 2024

Introduction

Recognized throughout the world, Syntony GNSS is a Toulouse-based brand with the FrenchTech label focused on technological innovation in the field of GNSS.

Specializing in radio navigation and embedded systems, we are world leaders in our field and present in many high-growth markets.

Our simulators, receivers, and indoor/outdoor positioning systems meet the growing needs of the aeronautics and space industries, as well as those of public transport, rail, and mining as well as IoT

With a portfolio of prestigious customers (Airbus, OneWeb, Airbus Safran Launchers, Thales Alenia Space, Honeywell, Rockwell, Key Sight, Stockholm, New York, Munich metros, and many others), we are constantly innovating to anticipate their future needs, strengthen our leadership, and conquer new markets.

The core of our business revolves around 3 fundamental pillars:

- Innovation, to design the products and tools of tomorrow, in line with the real needs of our customers;
- Dynamism, to adapt our strengths and talent to the quality of our products and solutions;
- Open-mindedness, to remain attentive to our customers and partners while respecting our employees, with the aim of promoting Humanism and the richness of multiculturalism.

Roles and mission

Under the responsibility of the Production Manager, ensure the manufacturing activities (assembly, assembly, testing), in series or not, of the equipment marketed by the company

Significant Activities

 - Assemble hardware elements (components, wiring)
 - Manage the inputs and outputs of components in your production order
- **Ensure production:**
 - Calibrate equipment in accordance with procedures and reference signals
 - Carry out production orders in accordance with the procedures in force
 - Produce: meet deadlines and expected production quantity
 - Install Firmware and Software
 - Test the functionalities and put them to the test under the expected acceptance conditions
 - Control and ensure the quality of the equipment produced
 - Complete production monitoring and traceability documents
 - Prepare deliveries (packaging, accessories, documents, palletizing, etc.)
 - Maintain equipment and workstation
- **Maintain your position**
 - Maintain, clean and take care of your workstation and your professional belongings (gowns, PPE, etc.)
 - Perform first-level maintenance
 - Report any malfunctions and suggest improvements

Responsibilities and Latitude of Action:

- Ensuring the quality of assembled products
- Maintain the quality of the production environment in compliance with the CSR approach
- Identify defects and promote diagnosis in the event of a malfunction
- Comply with safety rules/standards (wearing PPE, tools, welding, etc.)

Specific professional knowledge

- Read and apply procedures, manuals, work orders, etc.
- Know the PC architecture, LINUX environment
- Assemble electrical components and electronic boards in an industrial PC chassis
- Demonstrate dexterity, manual dexterity and precaution
- Mastering iron welding techniques
- Electrical Accreditation BE Testing for Platforms and Laboratories

Expected transversal skills:

- Organizational skills, rigor
- Positive listening skills
- Appetite for learning new technologies and environments
- Multicultural environment

Our values:

Dynamic, open-minded, innovative: we like to respect, tolerate, understand, collaborate
