

# GNSS Receivers Project Manager

## Permanent contract

**Syntony GNSS** is a human-sized company with an international dimension, based in Toulouse and labeled **FrenchTech**, specializing in **satellite navigation systems** (GNSS). **Since our recent integration into the Safran Group, we have entered a new phase of growth that combines the agility and innovative spirit of an SME with the solidity and global reach of a major industrial leader.** Together, we are helping to shape the future of resilient NWP technologies.

Our ambition: To provide our customers with relevant, innovative, reliable and robust solutions.

World leaders in radio navigation and embedded systems, we are present in fast-growing markets, such as aeronautics, space, road and rail transport, mining and IoT (Internet of Things). We have developed a range of products (simulators, receivers, indoor/outdoor location systems) that meet the growing needs of these industries.

Keysight, Airbus, Airbus Constellation, Hitachi Rail, Thales Alenia Space, Honeywell, Rockwell, MDA, or the Stockholm, New York and Toronto metros... So many partners who trust us and push us to always go further.

With passion, we constantly evolve our solutions to anticipate their needs and perfect our know-how.

At Syntony, we offer a pleasant and stimulating work environment, where the quality of life at work and the availability of our employees promote fulfillment and collaboration. Intellectual stimulation is omnipresent through innovative and varied projects.

We work on a variety of subjects, ranging from aeronautics to space, transport, mining and the environment.

Thus, Syntony vibrates around three fundamental values:

**Benevolence:**

Together, we cultivate listening, respect and empathy in our interactions, while also valuing the multiculturalism that enriches our exchanges.

We contribute to a positive environment where everyone feels valued and supported. We enrich each other by building strong relationships, both internally and externally.

**Excellence:**

Together, we strive for excellence in everything we do. Through our commitment, our high standards and our sense of responsibility, we guarantee quality, efficiency and performance. It is through our collective rigour that we meet challenges and provide sustainable solutions.

**Adaptability:**

Together, we are flexible in the face of the changes around us.

By combining creativity, collaboration and resilience, we find innovative solutions and move forward efficiently. Our agility allows us to evolve in line with our environment.

Join us and grow in a caring environment where your ideas take flight and your contributions strengthen the company's synergy.

## The Context

As part of our recent integration into the **Safran Group**, our business is taking on a new dimension. Indeed, this integration allows us to significantly expand and enrich our product range, while benefiting from new synergies and development prospects.

It is in this context of growth and renewed ambition that we are looking for a **GNSS Receivers Project Manager** to strengthen our Engineering Department and support the development of our product lines, in parallel with the management of strategic and ambitious projects.

## What you'll accomplish with Syntony GNSS

You will join the project department which coordinates the development of either products or adaptations for a business within the engineering department. You will work in a stimulating environment, at the heart of high value-added projects involving multidisciplinary teams. You will coordinate the various professions: GNSS system studies, electronics, software, testing and ensure compliance with contractual commitments, technical performance as well as cost and deadline objectives.

## The missions that will be entrusted to you

- Supervise the technical part of responses to calls for tenders on projects
- Contribute to the drafting of the proposal and validate the contractual scope with the client
- Monitor and manage the project (planning, dashboard, remains to be done, risks, milestone meetings, purchasing, document production, etc.) with the support of the Technical Manager of the corresponding product
- Validate project deliverables
- Develop project plans and the management structure (PMAQ, PDEV, etc.)
- Managing customer relations
- Managing flat-rate subcontracting
- Contribute to funding applications for innovation projects (EUSPA, ESA, etc...)
- Manage risks and opportunities

## The technical skills we are looking for

- Management of industrial development projects implementing hardware, hardware and software components.
- Knowledge of HW and software hardware development methods
- Strong appetite or previous experience in Systems Engineering highly appreciated allowing you to understand the big picture, manage complexity and ensure that all parts of a system work harmoniously
- Mastery of project management tools
- Ability to conduct exchanges with multiple high-level interlocutors, co-contracting, and a network of partners
- Establish and control the contractual requirements of the subcontractor and the client
- Fluency in technical and business English

## About you

Graduated from an engineering school or equivalent training Bac+5 in embedded systems, electronics or computer science, you have a strong appetite for technological challenges and have a minimum of 5 years' experience in the development of HW and SW products and project management in an industrial environment.

You are recognized for your interpersonal and communication skills that allow you to establish relationships of trust and to federate and motivate multidisciplinary teams around common objectives, promoting collaboration and collective performance.

Your sense of responsibility and your results-oriented approach allow you to ensure that the commitments made are respected and to react effectively when necessary. You are able to present and defend project issues to decision-making bodies, by providing a clear, well-argued vision.

Do you recognize yourself in this description? Apply and join a company that promotes innovation in the development of its unique products to design the products of tomorrow, dynamism and open-mindedness in listening to and respecting its customers and employees.

## Why join us?

- Benefit from the solidity and prospects of a large group like Safran, while evolving in a human-sized environment where your impact is real and visible.
- Joining a company where innovation, high standards and benevolence guide our projects and decisions.
- Grow in a learning and stimulating environment, alongside passionate teams, on various projects with an international dimension.
